

CONVENTIONAL AND CNC TURNING MACHINES

CONVENTIONAL SERIES

High Precision Conventional Tool Room Lathes with wide range of accessories for turning, grinding, milling, drilling etc.

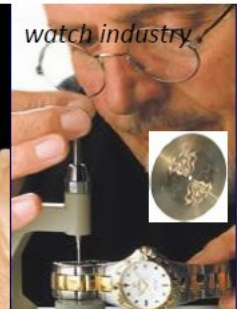

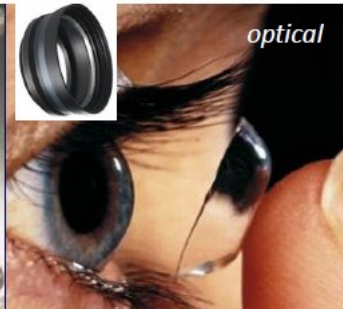

Grinding attachment with
integrated motor
(4000 - 24000 RPM)

Carriage with digital read out

Milling attachment with
integrated motor
(600—9000 RPM)

CNC/ CCN SERIES

High Precision Lathes with CNC control FANUC.

For turning with linear tooling system or turret with 8 or 12 tools (fixed or rotary).

The machines are ideal to be used for soft and hard turning of single parts as well as for small to medium batch sizes.

- ✔ **Workhead spindle run out
0.0005 mm**
- ✔ **Hard Turning : Up to 65 HRC**
- ✔ **Surface Finish : Ra 0.2 to 0.4**
- ✔ **Fanuc Control**

142 series

136 series

Up to 65 ROCKWELL-HRC
 $Ra = 0,1 - 0,4$
